Shifting Business  
Thoughts to Reality

## OUR PROFILE

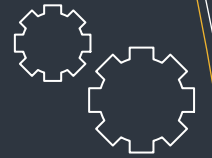

Rapidsoftech is a software solutions provider team based in India and providing specialized services in outsourced product development and custom software development. Our team has a focused vision of providing extensive Software & Application development/ QA Services / IT enabled services. We have established an offshore resource centre and target our services at the international market. Our team is specialized in Microsoft .Net platform & our focus is to deliver right solutions to our client's requirements through our proven Project Delivery and Quality Tested mechanism. In the present environment, when efforts to save costs and reduce burn-rate are most important, Rapidsoftech provide solutions that match your budget and schedule so that you can cut time to market.

To reach our goal of Customer Satisfaction, we work according to a pre defined vision, which guide us to accomplish our goal. We consider our client success as the only way to our success. We give adequate amount of efforts to make sure that whatever we are delivering to our customer should be a top notched quality product. Our vision is deriving us to understand the business thoughts of our customers, keeping a superior communication channel in development life cycle and providing them with the maximum benefits of outsourcing in terms of financial aspects.

Ever since the outset of Rapidsoftech to the current instance, we give the first precedence to our customers. We endeavor to give our customers the best solution according to their business requirements and help them in getting new heights in their respective businesses. . We believe that whatever solutions we are providing, should be able to shift your business thoughts into a reality at very affordable prices that will not let you down on quality standards and quality output of our team proves this. Our talent to create dominant, influential software's is due to the commitment and concentration we provide to every client. We believe in one thing that is Customer Satisfaction and by achieving that, we can shift our self from a service provider to a technology partner for our customers.

Rapidsoftech team is a unique combination of technical expertise and management capabilities which can provide a better outsourcing experience to our customers in achieving their business success. We believe in setting up long term business relations with our customers, so that we can capitalize along with our customer's success.

## ENTERPRISE SERVICES

Rapidsoftech provide the services in a number of different fields of software development. With all these services, our sole purpose is to provide complete customers satisfaction and shift the business thoughts into reality. The main stream of our services is Web based development and Web designing.

### CUSTOM DEVELOPMENT

In today's competitive world everyone have their own requirements in software development so custom application development is the right way to get that. Whether you just need a number of features to be added to your existing custom application or an entirely new custom application, we'll take the challenge no matter how sophisticated your project is. Our team is capable to create any kind of application for you - from GUI applications to sophisticated and complex programming applications. We have the expertise and experience to deliver Custom Systems Development applications of any scale and scope. Our cost-effective and competitive business solutions provide an opportunity for our customers to develop a competitive edge over the others by adopting the latest technologies and better database design.

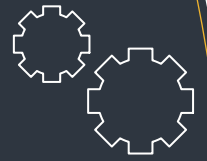

### WEB DEVELOPMENT

The real potential of the Internet, however, lies in the backend integration of various applications that can streamline your business processes. In current business scenario, organizations spend hefty amount on e-business and web applications in order to promote and sell their products, services and to cater global business presence and relations. Rapidsoftech provide services in web applications and web development category. We are committed to deliver products with high quality standards and at reasonable and realistic costs

### WEB DESIGNING

A website is the cheapest & best means of branding a particular product. It's a live & an electronic demonstration which needs mere graphical richness. It's more about innovative technology. It is the fastest means of advertisement. Ease of navigation, consistency of overall layout, depth of content, originality, and quality of execution are just a few of the details that matter to us. In any website, over all look matters a lot and plays a significant role. Our team at Rapidsoftech, design the websites for corporate or small businesses who want to integrate the websites in to a vital part of their effort in marketing. Rapidsoftech design websites are eye-catching and fast to load backed with best technology. Our designs will be pleasant and functional as well.
